

Mobile Application Development

Session 8 – Additional Exercises

1. ThemeRoller and Kuler

Practice creating new colour schemes with Adobe Kuler, and using them to create and apply new themes with ThemeRoller.

2. jQuery Mobile Global Configurations

Set the default transition for your Zedland Hotel application, by changing the framework global configurations with the *mobileinit* event handler in *config.js*.

3. jQuery Mobile Global Configurations

Practice making other changes to the jQM framework default configurations.
