

# Mobile Application Development

---

## Session 5 – Additional Exercises

---

### 1. Google Maps

Currently the map at *maps.html* only has a marker for the Churchill Hotel. Add markers with accompanying infowindows for the remaining five star hotels. Use <http://itouchmap.com/latlong.html> to find coordinates.

Experiment with zoom levels for the map.

### 2. Explore jQuery/Google Maps Plugins

Explore the jquery-ui-map plugin. Study the example code and try some of the solutions in your own test applications.
